

YOUR LASIK PROCEDURE

JUST GOT SMARTER

With the *iDESIGN Advanced WaveScan Studio* System

MORE BRAIN POWER
TO HELP YOU SEE CLEARLY WITHOUT THE
HASSLE OF CONTACTS OR GLASSES.

INDICATIONS AND IMPORTANT SAFETY INFORMATION

CAUTION: U.S. Federal Law restricts this device to sale, distribution, and use by or on the order of a physician or other licensed eye care practitioner.

INDICATIONS: *Advanced CustomVue*[®] LASIK (laser assisted in situ keratomileusis) is a customized wavefront-guided laser surgery procedure that uses the *iDESIGN Advanced WaveScan Studio* System to measure visual imperfections of your eye and the *STAR S4 IR*[®] Excimer Laser to permanently reshape the cornea. *Advanced CustomVue*[®] LASIK treatment is used to correct or reduce myopia (nearsightedness) with and without astigmatism for patients 18 years of age and older and whose vision has been stable for at least one year. Only eye care professionals trained in laser vision correction can determine whether you are a suitable candidate.

CONTRAINDICATIONS: You should not have LASIK if you have collagen vascular (e.g., rheumatoid arthritis), autoimmune (e.g., lupus), or immunodeficiency diseases (e.g., AIDS) because they affect the body's ability to heal. You should not have this procedure if you are pregnant or nursing; show signs of corneal abnormalities or corneal thinning; have symptoms of significant dry eyes; advanced glaucoma; and uncontrolled diabetes. If you have severely dry eyes, LASIK may increase the dryness, may delay healing after surgery, may or may not go away and it may result in poor vision after LASIK.

THE BRAIN POWERING YOUR PERSONALIZED TREATMENT PLAN

Working like a “brain,” the **iDESIGN Advanced WaveScan Studio (iDESIGN)** System captures more data than ever before to create a detailed picture of your eye’s unique imperfections and accurately plan a treatment for you alone.

Your 100% personalized LASIK procedure begins with a custom treatment plan, created by proprietary wavefront eye-mapping technology from the **iDESIGN** System.

YOUR **iDESIGN** SYSTEM-DRIVEN LASIK PROCEDURE CAN HELP GIVE YOU THE FREEDOM TO LIVE HASSLE-FREE FROM CONTACTS OR GLASSES**

* Compared to the **WaveScan WaveFront®** System

CLEARER, SHARPER VISION YOU’LL ENJOY DAY AND NIGHT

At 6 months after surgery, nearsighted patients in a clinical study reported¹:

WERE NOT LIMITED IN ACTIVE SPORTS OR OUTDOOR ACTIVITIES

HAD LITTLE TO NO DIFFICULTY WITH THE CLARITY OF THEIR VISION

WERE SATISFIED WITH THEIR VISION AFTER SURGERY

** You may need reading glasses after laser surgery even if you did not wear them before. Your vision may not be perfect, and you may need to wear glasses or contact lenses for some activities even after laser vision correction.

WARNINGS AND PRECAUTIONS: LASIK is not recommended if you have cataracts, corneal scars, or dry eye syndrome; glaucoma; diabetes; severe allergies; history of Herpes simplex or Herpes zoster keratitis; are taking Isotretinoin (Accutane®), Sumatriptan (Imitrex®), Amiodarone hydrochloride (Cordarone®) or antimetabolites for any medical conditions; history of crossed eyes; previous corneal, intraocular surgery, LASIK or refractive surgery; family history of degenerative corneal disease; and history of inflammation of the eye. Your doctor will examine your eyes to determine if you are a candidate for this procedure. Talk to your doctor about any eye-related conditions, injuries, or surgeries you have had, any medications you are taking, and any changes to your vision in the past year. After surgery, you may find it more difficult to see in conditions such as dim light, rain, snow, fog, or glare from bright lights at night. Future measurements of your eye pressure or future cataract surgery can be affected by this procedure. Tell your future doctor you’ve had **Advanced CustomVue®** LASIK surgery.

ASK YOUR DOCTOR ABOUT THE *iDESIGN* SYSTEM-DRIVEN LASIK PROCEDURE TODAY.

IMPORTANT SAFETY INFORMATION (CONTINUED)

1. Data on file: Myopia US IDE Study 110-IDMY. Additional Patient Reported Outcome Analyses. (N=170 patients)

RISKS: As with any surgical procedure, there are risks associated with *Advanced CustomVue*[®] LASIK treatments. It is important to discuss these risks with your doctor before you make any decision to have the surgery. If the results of the surgery are not satisfactory, your doctor may want to perform additional laser treatment in either one or both eyes. Talk to your doctor about what is best for you. Some risks are related to the creation of the corneal flap. Corneal flap complications include but are not limited to: cutting an incomplete, irregular flap or free flap; misalignment of the flap; and perforation of the cornea. Corneal flap complications range in severity from those that simply require the treatment to be postponed for several months to those which create corneal irregularities resulting in permanently blurred vision.

SIDE EFFECTS: Possible side effects include loss of vision and visual disturbances such as double vision, sensitivity to bright lights, increased difficulty with night vision, fluctuations in vision, and other visual irregularities that may be debilitating.

Please consult with your eye care professional and carefully review the Patient Information Booklet regarding the potential risks and benefits of this procedure. Results may vary for each individual patient.
